To Dear Jim:

You will please note on the attached logging  
report for the #1 W. L. L. well, that we  
had normally casing failure & pump an extra  
25 sack plug from 250' up to 180'. This cost  
an additional <sup>46</sup>350<sup>00</sup>, but as the well is close  
to the reservoir, we wanted to be as careful  
as possible. I thought you would like to  
know this.

Best regards,  
Lephant
