Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

Please forward onto John Heil

This Supp. Form 27 is being submitted for the Foundation Energy CS 8-11-4-104 spill that occurred in 2015. Samples have been collected from the area where the spill flowed and results indicated no exceedances to Table 910-1 thresholds with the exception to arsenic, which is comparable to background levels.

Foundation is requesting closure of this spill and REM# 20084 under the previously implemented Table 910-1 thresholds as approved within the Initial Form 27 (Doc# 402754247).

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
