## Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

## OPERATOR COMMENT

Please forward onto John Heil

This Supplemental Form 27 is being submitted to request closure of the Foundation Rock Canyon 9-34-4-104 produced water spill that occurred in 2014.

Confirmation samples collected indicated the soil complies with COGCC Table 910-1 with the exception to arsenic. Foundation is requesting allowance to the arsenic exceedances as values are below background concentrations.

Foundation is requesting closure of the above spill and REM# 21156 under the previously implemented COGCC Table 910-1 rules as approved within the Initial Form 27 (Doc# 402755820).

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
