(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Date of work June 20, 1974

Well was spudded on June 12, 1974. After running & cementing surface casing, well was drilling into upper "J" Sand & a drill stem test run. A 60' core was then cut in "J" Sand & electric logs run. Drill Stem tests were then run in lower "J" Sand & "D" Sand. Since results of all drill stem tests proved negative, the well was plugged & abandoned as follows:

- 35 sacks cement plug from 6240' to 6350'
- 15 sacks cement plug from 255' to 285'
- 10 sacks cement plug from surface to 30'
