Mr. W. H. Sharp  
P.O. Box 113  
Kimball, Nebraska

Attention: Mr. John Abramson

Dear Mr. Sharp:

Although your production reports required by this office have been received, we have several points that must be clarified.

First: According to our records, the J. F. Kirk #1A is completed in the "D"; the J. F. Kirk #2A is completed in both the "D" and the "J", and the Kirk-Lynch #1 is completed in the "D". On the production reports, OGCC Form 7, it is noted that you indicate "J" as the only pool for each well. Please advise which is correct, and if the pools, as indicated in the well files, are not correct, submit such reports as are necessary to bring the well files up to date.

Second: The gas as reported does not check with the figures submitted by the gas purchasers. The following tabulation will show the discrepancies:

<u>Month</u>	<u>Kirk "A" Lease</u>		<u>Kirk-Lynch</u>	
	<u>Sharp</u>	<u>Shell</u>	<u>Sharp</u>	<u>Kansas-Nebraska</u>
January	9,978	12,971	1,504	1,792
February	7,916	11,891	1,175	1,400
March	9,900	9,434	1,350	1,732
April	9,834	12,100	1,336	1,592
May	9,020	11,718	1,200	1,605
June	8,920	11,947	1,170	1,429
July	8,990	11,527	1,159	1,382
August	8,343	10,713	8,150	9,712
September	12,483	9,941	8,825	14,875
October	12,638	9,632	7,192	15,095

A partial answer to the gas figures could be that either you or the purchasers are not reporting on a pressure base of 15.025 psia, as required by our rules - but this is obviously not the entire answer.

With regard to past delinquency in production reporting, I would like to point out that we are looking into the possibility of publishing a monthly production report of some nature for Colorado, and it would be imperative that no delinquency occur which had not been previously explained and excused by the Commission.

Your prompt cooperation in clearing up the pool and gas production situation will be greatly appreciated.

Yours very truly,

OIL AND GAS CONSERVATION COMMISSION

William R. Smith, Senior Petroleum Engineer
