Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	GROUNDWATER	Unknown	Undetermined
Yes	SOILS	Unknown	Undetermined

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures taken to abate, investigate, and/or remediate impacts associated with E&P Waste.

Section of flowline and associated wells shut in. Equipment was brought in same day to remove standing liquids and contain flowline release at ground surface level.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

The total horizontal and vertical extent has not been established. Extent of impact will be based on limits of final excavation. Final vertical and horizontal extent of the excavation will be based on results from collected grab soil samples from the excavation walls and floor. All soil samples will be analyzed and verified compliant with COGCC Table 915-1.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is discovered during excavation, monitoring wells will be installed to collect samples.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

☐ Is further site investigation required?

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No _____

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

All impacted soil will be excavated and hauled to a certified disposal location.

REMEDIAL ACTION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Excavation will be performed to remove all impacted soil. Impacted soil will be disposed of at the Front Range Landfill in Erie, CO. Excavation activities are ongoing. Following the completion of excavation activities, soil samples will be collected.

☐ Compliant with Rule 913.h.(2).

☐ Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? _____

Does the previous reply indicate consideration of background concentrations? _____

Does Groundwater meet Table 915-1 standards? _____

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the COGCC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Upon obtaining complaint confirmation soil samples, the excavation area will be backfilled using clean fill dirt, recontoured, and seeded.

Is the described reclamation complete? No _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☐ Interim

☐ Final

Did the Surface Owner provide the seed mix? No _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? No _____

Description

	The Operator proposed a site investigation commencement date of 10/19/2021; However, no update on the progress of the site investigation has been provided in Doc #402923334 submitted on January 11, 2022. The Operator shall provide a progress update in the next subsequent form 27s.
	In accordance with Rule 914 if groundwater impacts are discovered monitoring wells are required to define the horizontal extent of impacts to groundwater. More than four wells may be required to obtain a point of compliance. The monitoring wells shall be installed within 45 days of approval of this Form 27. Additionally, COGCC requests that any monitoring wells installed be constructed as permanent monitoring wells.
	Operator shall provide all waste manifests that have not previously been submitted for oily waste hauled off site for disposal. Including disposal documentation for the reported 100 cubic yards of soil previously removed, as well as, documentation for the disposal of the removed standing liquids and fluids from the flowline release at surface level reported during the initial action phase (if different than the 100 cubic yards). The Operator shall submit the requested records in the next subsequent Form 27s the records in accordance with to Rules 905.b.(3).
	Operator will provide notice to COGCC EPS Nikki Graber (nikki.graber@state.co.us) at least 48 hours prior to backfill, monitoring well installation, or any sampling events performed on location and after the approval of this form.
	As previously stated on Doc # 402841929: Operator will submit analytical laboratory reports, sample location map, and a table comparing results to Table 915-1 for all samples collected at this location. GPS data used to create the map must comply with COGCC Rule 216.
	As previously stated on Doc # 402841929: If field screening is to be used in conjunction with laboratory reports to define the horizontal and vertical impacts, Operator shall provide field screening readings when submitting the Form 27 Supplemental Site Investigation.
	As previously stated on Doc # 402841929: Operator shall provide boring logs for any monitoring wells installed on location in accordance with standard environmental practices. This includes at a minimum; lithology description, USCS classifications, PID readings, sample collection depths, depth to water, and well construction.

	As previously stated on Doc # 402841929: A supplemental Form 27 must be submitted within 45 days of the completion of any environmental investigation.
