## OPERATOR COMMENTS AND SUBMITTAL

Comments	<p>This location is listed as within sensitive water resources due to the shallow depth to groundwater.</p> <p>The ranch manager for TH Ranch (surface owner) informed Confluence that the building unit 1,256' N of the edge of location has been torn down. All that remains are two buildings offset the torn-down building unit: garage and a barn. Therefore, there are zero building units within a 2,000' buffer of the WPS. Aerial imagery does not yet reflect this change.</p> <p>This location does not require the operator submit the following plans: Odor, Transportation, Hydrogen Sulfide Drilling Operations, Flood Shut-In, Gas Capture, Geologic Hazard and Community Outreach.</p> <p>Confluence DJ LLC respectfully requests a Lesser Impact Area exemption to Rule 304.c.(2). Please see the attached written request.</p> <p>The Approved WOGLA # is 1041 WOGLA 20-0069.</p> <p>Confluence inherited an already submitted 2A for the 70 Ranch 10 East location (451960) via the purchase of Edge Energy in 2017. This location was permitted for 12 wellbores and limited production equip. As part of an appraisal process, Confluence constructed the location and drilled two appraisal wells (that send their production via flowline to the 70 Ranch 10 West location ~1 mi. west). After assessing the best plan of development for the subject lands based on the appraisal well performance, it became clear that the 70 Ranch 10 East location, which is constrained by surface features and future plans of the surface owner) wouldn't be able to house the number of wells and amount of equipment needed to optimally produce the subject lands. Therefore, the Bigfoot 11 location was proposed as an alternative.</p>
