Corrective Action: The storage of equipment not necessary for use on location is prohibited.

Date: 03/23/2022

Response: CA COMPLETED

Date of Completion: 03/01/2022

Operator
Comment:

The materials and equipment noted in this inspection are related to the construction and installation of an upgraded water line that is necessary to support TEP's oil and gas operations in and around Parachute, CO. Equipment and construction materials / supplies are temporarily staged at various locations to support the water line project. All staging areas have been discussed with, and approved by the respective land owners. The water line installation project will be completed by mid-April 2022, after which all equipment and materials will be removed, and all disturbed areas will be cleaned up and restored to their pre-existing condition. All equipment and materials are staged / stored in such a manner so as to not interfere with site access, or access by emergency response vehicles (if needed).
