**General Comment:**

COGCC Inspection Report Summary

On Tuesday 2/22/2022 at approximately 1000, I, Inspector Scott Ramsey, conducted a routine inspection at TEP Snyder A, at Location # 311651 in Garfield county Colorado.

Any Corrective Actions from previous Inspections that have not been addressed are still applicable.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management, the internal buffer of the 411 (PWS) protection and Geologic Hazard area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad.

Location is snow covered in areas at the time of inspection and plowed.

During this inspection the following possible compliance issues were observed:

1. Separator units include attached storage tanks. The sight glass located on the side of the unit indicates the storage tank is full of an unknown fluid. No form of labeling or markers are present to identify a potential hazard or the contents of the storage tank.
2. Random debris.
3. Load lines missing plug/cap.
4. Open cellar and open fencing at well heads.
5. Unmarked risers.
6. 2 tanks not labeled.
7. 1 tank is not secured.

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

This is a summary of inspection report.
