General Comment:

[COGCC Inspection Report Summary](#)
On Friday 2/25/2022 at approximately 1100, I, Inspector Scott Ramsey, conducted a routine inspection at TEP Hangs A, at Location # 336023 in Garfield county Colorado.
Any Corrective Actions from previous Inspections that have not been addressed are still applicable.
While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management and the 411 (PWS) protection. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad.
Location is snow covered in areas at the time of inspection and NOT plowed.
During this inspection the following possible compliance issues were observed:
1. Separator units include attached storage tanks. The sight glass located on the side of the unit indicates the storage tank is full of an unknown fluid. No form of labeling or markers are present to identify a potential hazard or the contents of the storage tank.
2. Some unmarked risers.
3. Signage on separators is wrong operator.
4. Debris at well heads.

Refer to photograph of observed compliance issue.
A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.
This is a summary of inspection report.
