Subject: **Discharge Monitoring Reports for January 2022 for Wellington Operating Co. -
COGCC 281818, 281824, & 416077**
Submitted electronically

Dear Mr. Allison:

Attached please find the Discharge Monitoring Reports (DMRs) for the subject facility for January 2022.

The facility did operate and discharge treated wastewater during the month of January 2022. A compliance sample was collected and analyzed during January and the laboratory data is attached. As expected, the barium and fluoride exceed the new discharge limits but the month of November is within my compliance schedule. No other analyzed parameters exceeded their discharge limits.

As requested, I have prepared and attached a copy of a water balance sheet for the Wellington Produced Treatment facility and the Wellington Muddy Sand Stone Unit – South Battery for January 2022. This water balance is being submitted voluntarily and is not required by the current discharge permit.

Mr. Randy Evans is the current operator in responsible charge for the facility.

If you have questions regarding facility operations, please contact Randy Evans at cell 970-402-0418; email: rgrekans477@gmail.com.

Sincerely,

A handwritten signature in dark ink, appearing to read "Randy Evans". The signature is fluid and cursive, with the first name "Randy" being more prominent than the last name "Evans".

Randy R. Evans
Operator in Responsible Charge
