Good morning, Jim,

Logos Resources is in the process of updating the submitted Form 27 and submitting to the COGCC this morning.

Remediation plan for today's work activities to excavate to 6'(bgs) the existing soil that was backfilled where the former below grade tank. Collect discreet samples and analyze the soil for Total Petroleum Hydrocarbons. The work will begin at 9:00am and confirmation samples will be collected from 10:00am to 11:00 am.

Please let me know if you should have any questions and/or concerns.

Thank you,

Vanessa Fields
