## COMMENTS:

The Rangely Oil and Gas Field (Rangely Field) is operated by Scout Energy Partners (Scout). There are 325 producing wells at the Rangely Field dispersed over 27 Collection Stations. Multiple wells flow to each of the 27 individual Collection Stations. Special Purpose Relief Pits (Pits) are located at 16 of the 27 Collection Stations.

Scout is requesting an alternative sampling approach to the Colorado Oil and Gas Conservation Commission (COGCC) Rule 909.j. via the COGCC Rule 909.j.(6). The alternative sampling approach to sampling each production well includes characterization of produced water from multiple wells that feed Collection Stations and discharge to the Pits during upset conditions. Proposed sample collection of produced water will be a composite sample of production wells from the Test Separator at Collection Stations. The produced water quality analysis includes the full list in the COGCC Rule 909.j.(1).

Produced water quality analytical results from sampling will be submitted on a Form 43.

The Following Collection stations, in addition to Collection Station #3, will be sampled as part of this sampling plan:

- Collection Station #5 (Facility ID #102578) Updated as requested
- Collection Station #6 (Facility ID #445128)
- Collection Station #8 (Facility ID #102574)
- Collection Station #9 (Facility ID #102580)
