General Comment:This is a Final Reclamation inspection at the request of COGCC Enforcement.

Environmental**Spills/Releases:**

Type of Spill: _____

Estimated Spill Volume: _____

Comment: Based on historic aerial imagery and field observations, there appears to be areas impacted from the pit that could be associated with produced water. The northern half of the tank battery and areas adjacent to the northern tank battery are exposed bare soil with no vegetation. Refer to the attached inspection photos.

Corrective Action: At a minimum, Operator shall conduct sampling and analysis of soil pursuant to rules 915.b and 915.e.(2)D to determine the horizontal and vertical extent of inorganic pollutants that may be inhabiting vegetative growth. Completion of delineation will be reported on a Form 27. Operator shall perform sampling and analysis before conducting final reclamation activities. There is no corrective action date since this is an enforcement matter.

Comment:

	<p>It appears the Operator failed to respond to the previous final reclamation corrective action inspection from 2017 (Doc.# 682501916). There is no indication that further reclamation activities have been performed.</p> <p>The location does not comply with final reclamation rules. There is exposed soil/insufficient vegetative cover throughout the tank battery (and north of the tank battery), access road and well location. The access road has not been contoured but desirable vegetation has started to establish and stabilize the access road.</p>	
Corrective Action:	<p>After the Operator has fulfilled the requirements of Rule 915.b and 915.e.(2)D, then Operator shall comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p>	Date 05/31/2017
Overall Final Reclamation	Fail	Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
