Comment: Operator has performed final reclamation activities; however, the entire location has established with mostly Russian thistle. The fence around the location appears to be catching Russian thistle which is then depositing its seeds onto location. Operator should consider taking down the fence; otherwise, Russian thistle from off location will continue to catch in the fence and deposit its seeds onto the reclamation area.

Corrective Action:	<p>Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p> <p>Final reclamation activities shall be complete no later than 11/14/22 or as soon as environmental conditions will permit. Operator shall make every attempt to perform additional reclamation activities during Spring 2022.</p>	Date	11/14/2022
