480102	SPILL OR RELEASE	CL	09/07/2021		-	Garcia Injection Well	EI

General Comment:

This is an environmental inspection to document status of Remediation 19830. This inspection is being entered for notification and documentation only and is not intended to provide the Operator the opportunity to resolve the alleged violations without the imposition of a penalty, pursuant to Rule 523.b.

Operator is delinquent in submitting quarterly analytical results in violation of Rule 913.e. Operator submitted a Form 27 in 1st quarter 2022 with analytical results from 3rd quarter 2021. COGCC records indicate that no work has been done on this remediation since 3rd quarter 2021. No analytical results have been received for 4th quarter 2021 or 1st quarter 2022.

Sampling pit on location has remained open for over 8 months. No secondary containment is present on this location and a spill of fluids from tank would likely flow into pit and adjacent stream and contaminate groundwater and surface water. Corrective action to install secondary containment by 5/28/2022 from COGCC inspection 695105925 has not been addressed.

Other than the removal of unused tank and installation of tank without secondary containment, this inspector has observed no change in the remediation or condition of the facility since I last inspected in October 2021.
