General Comment:

On 06/08/2022, Reclamation Specialist O'Malley conducted a reclamation and stormwater inspection at SWN Production Company LLC's Amelia-67N93W /1SESE Location #313326 in Moffat County, Colorado.

The following compliance issues were observed during this inspection:
- Noxious Weeds

Refer to the "Location," "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Comment

Refer to the "Location" section of this document for weed control corrective action.

It was observed in this inspection that interim areas of the Location appear to have been seeded with smooth brome. Interim areas have not been recontoured to match the surrounding landscape; soil piles/berms are present. Soils in the interim areas appear very compacted. Penetration with a shovel was difficult and soils were dense and platy compared to undisturbed areas. Due to a lack of recontouring and decompaction, interim areas of the Location must be fully reclaimed during final reclamation.

Comment:	<p>Operator submitted Notice of Intent to Abandon #402951383. Per 1004 Rules, reclamation work shall be completed within twelve (12) months on non-crop land after plugging a well or final closure of associated production facilities.</p> <p>It was observed in this inspection that the Location was previously seeded with non-native species which do not match reference areas. Per 1004 Rules vegetative cover should reflect reference area forbs, shrubs and grasses and the Operator must use a seed mixture provided by the surface owner, or a mixture prescribed by the local soil conservation district.</p> <p>A flowline riser and power line were observed to the south. Both must be removed for final reclamation along with all other equipment.</p>	
Corrective Action:	<p>Provide, attached to an FIRR a signed Surface Owner letter indicating the seed mixture for final reclamation. In the absence of an agreement between the Operator and the Surface Owner, provide a signed letter indicating the seed mixture for final reclamation from the local soil conservation district.</p>	Date 08/12/2022
