Denver, CO 80203

Subject: **Discharge Monitoring Report for May 2022 for Wellington Operating Co. –
COGCC Permit Numbers 281818, 281824, & 416077**
Submitted electronically

Dear Mr. Allison:

Attached please find the Discharge Monitoring Reports (DMRs) for the subject Wellington Operating Company (WOC) facility for May 2022.

The facility did not operate and discharge treated wastewater during the month of May 2022. The reason water was not treated or discharged was due to the installation of the new reverse osmosis system for which major components arrived by mid-May resulting in a delay in the equipment installation and commissioning. A compliance sample was not collected or analyzed during May 2022 and laboratory data is not attached. The result is that no parameters exceed the new discharge limits for the month of May 2022.

Quarterly samples were collected and analyzed from the existing five monitoring wells and the laboratory data is attached. No parameters exceed the new discharge limits for the month of May 2022 at the monitoring well outfalls.

As requested, WOC has prepared and attached a copy of a water balance sheet for the Wellington Produced Treatment facility and the Wellington Muddy Sand Stone Unit – South Battery for May 2022. This water balance is being submitted voluntarily and is not required by the current discharge permit.

Mr. Randy Evans is the current operator in responsible charge for the facility.

If you have questions regarding facility operations, please contact Randy Evans at cell 970-402-0418; email: rgrevans477@gmail.com.

Sincerely,

A handwritten signature in dark ink that reads "Randy Evans". The signature is written in a cursive, flowing style.

Randy R. Evans
Operator in Responsible Charge
