Response: FACTUAL REVIEW REQUEST

Basis for Review: Action requested was already completed prior to the inspection

Operator Comment: 603.o is not applicable to produced water tank on Garcia 1 location. 603.o is only applicable to "new and significantly modified crude oil, condensate, and produced water storage Tanks."  
However, Oxy will install an earthen berm and straw waddles around the perimeter of the location as a secondary containment mechanism while excavation work is ongoing. Oxy will commit to completion of this work by 6/24/2022  
Oxy is evaluating permanent containment options around the produced water tank once excavation activities are complete.

COGCC Decision: **Not Approved**
