Issue of Concern:	<p>On 5/24/2022 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:</p> <p>-Corrective actions from 2020 reclamation inspection are not adequately addressed. Operator submitted FIR Resolution Form documents operators response to corrective actions. However, erosion and bare soils observed in 2020 persist.</p> <p>-Stormwater and erosion controls need to be installed and maintained onsite until location is stabilized with desirable perennial vegetation. Stormwater controls (ie: BMPs) and erosion controls (crimped mulch, erosion control blanket, hydromulch, etc.) need to be installed and maintained within the project area until stabilized with desirable perennial vegetation. Corrective action date: 6/30/2022</p> <p>See below, and attached photos for additional detail.</p> <p>Bare and weedy soils persist throughout the interim reclamation area. Erosional features such as rilling and sediment deposition observed on the fill slope and around the well pad entrance.</p> <p>Stormwater controls (ie: BMPs) and erosion controls (crimped mulch, erosion control blanket, hydromulch, etc.) need to be installed and maintained within the project area until stabilized with desirable perennial vegetation. Corrective action date: 6/30/2022</p>
