General Comment:

On 06/22/2022, Reclamation Specialist O'Malley conducted a final reclamation and stormwater inspection at TEP Rocky Mountain LLC's Youberg-66S94W /35SESE Location #383144 in Garfield County, Colorado. The Location was constructed, no wells were drilled.

The following compliance issues were observed during this inspection:

- Noxious weeds and undesirable plant species
- Final Reclamation: vegetation not progressing
- Stormwater: erosion of slopes, control measures in disrepair

Refer to the "Location," "Reclamation," and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Good Housekeeping:

Type

WEEDS

Comment:

It was observed in this inspection that one musk thistle (List B Noxious Weed) is present on Location. Inspector removed the plant. Cheatgrass (List C Noxious Weed), Russian thistle, kochia and field brome (undesirable plant species) are also widespread and dominant in multiple areas of the Location. Field bindweed (List C Noxious Weed) is also widespread. A fall corrective action date is being given to allow for appropriate treatment of cheatgrass. Operator is encouraged to control weeds as quickly as possible, but also to determine the best method of weed control and implement at the appropriate time.

Corrective Action:

Conduct weed management to prevent further establishment and spread of noxious weeds and undesirable plant species; ongoing weed management required until location passes final reclamation.

Comment:

	<p>Refer to the "Location" section of this inspection report for weed control corrective action.</p> <p>It was observed in this inspection that the access road and areas at the northeast, southeast and several other areas of the Location are not progressing towards non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. These areas have few perennial species present and are dominated by annual, noxious weeds and undesirable plant species.</p> <p>Additional reclamation is necessary. Per document #1159748, reclamation on this Location began approximately 01/01/05.</p>	
Corrective Action:	<p>Comply with 1004 Rules.</p> <p>Conduct additional reclamation in accordance with COGCC 1000 series rules. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be completed no later than 11/15/2022.</p>	Date 11/15/2022
<p>Overall Final Reclamation Fail Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/></p>

Waddles	Fail					
Comment:	<p>Insufficient stormwater and sediment control measures in place; straw wattles installed at the north of the Location are in disrepair and have not been maintained in a proper functioning condition. Some wattles have come unstaked. Runoff was observed cutting under the wattles resulting in rill erosion and offsite sediment transport.</p>					
Corrective Action:	<p>Install or repair required BMPs per Rule 1002.f.</p>					Date: 07/08/2022
Pits:	<p><input type="checkbox"/> NO SURFACE INDICATION OF PIT</p>
