RE: Evergreen Natural Resources LLC 909J Sampling Non-Applicability

To Whom it May Concern,

The following attached wells have an onsite pit that must comply with 909J sampling, effective on January 15th, 2021. The associated well has not produced water since 909J Rules have been made effective, making it incapable to grab a sample to represent the pit. Evergreen intends to complete the 909J sampling requirements when the well begins to produce water. A list of the non-applicable wells, their API numbers, associated Pit Facility ID numbers and last recorded date of water production is attached herein.

Sincerely,

Mackenzie Smith

Mackenzie Smith
