Inspection Photos  
Location Name: Benzel/26-6H (F25NWB)  
Location ID: 423182

**Photo 3.** Map shows the distance from the producing wells at the northwest of the Location to the southwestern edge of the pad is approximately 140 feet. Areas at the southwest of the working pad area not necessary for production operations can be reduced and reclaimed.

## Inspection Photos

Location Name: Benzel/26-6H (F25NWB)

Location ID: 423182

**Photo 4.** Photo taken from the east of the Location shows perennial pepperweed (CO List B Noxious Weed).

**Photo 5.** Photo taken from the sediment pond at the southwest of the Location shows Russian knapweed (CO List B Noxious Weed).

## Inspection Photos

Location Name: Benzel/26-6H (F25NWB)

Location ID: 423182

**Photo 6.** Photo taken from the north of the Location shows the northern interim area is dominated by seeded species including Russian wildrye, intermediate wheatgrass, and tall wheatgrass (non-native perennial grasses). Some western wheatgrass (native perennial grass) is occasionally present.

**Photo 7.** Photo taken from the east of the Location shows the eastern interim area is dominated by seeded perennial grasses. Photo also shows an example of an area with poor perennial grass establishment colonized by Russian thistle and kochia (undesirable plant species).
