**PROPOSED SAMPLING PLAN****Proposed Soil Sampling**

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Caerus has prepared the site investigation figure to delineate the previous footprint of the pit as well as the area which demonstrated exceedances to Table 910-1 standards. Caerus will install soil borings at all 9 locations and collect soil samples at 5 foot intervals beginning at five feet below ground surface. Caerus requests a reduced analyte suite based on the information provided in the 'Additional Investigative Actions' section located below.

**Proposed Groundwater Sampling**

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered at any of the proposed sampling locations Caerus will attempt to collect a representative groundwater sample for laboratory analysis with findings reported in a supplemental Form 27.

**Proposed Surface Water Sampling**

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

**Additional Investigative Actions**

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Caerus requests a reduced analyte suite based on the initial pit closure soil characterization sample included in the attached document. The characterization soil sample was collected on 10/25/2013 and is labeled as East Mid Bottom. Based on the exceedances identified in the characterization sample and exceedances found at the site during subsequent delineation and sampling when compared to the COGCC Table 915-1 groundwater protection standards for soil, Caerus requests the following reduced analyte suite for the project: GRO, DRO, ORO, BTEX, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, naphthalene, EC, SAR, pH, hot water soluble boron, arsenic, and chromium (VI).
