General Comment:

On 06/29/2022, Reclamation Specialist O'Malley conducted a Final Reclamation and Stormwater inspection at Wyman* Louis M DBA Wyman Inc's Weco-UPRC Kleitz 23-29-67N92W /29NESW Location #313012 in Moffat County, Colorado.

The following compliance issues were observed during this inspection:

- Final Reclamation: equipment remains on Location
- Stormwater: eroding cut slope

Refer to the "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

1004.d. FINAL VEGETATION TRANSECT
 TRANSECT RESULTS OF DISTURBED AREA% 23
 TRANSECT RESULTS OF REFERENCE AREA% 30
 TOTAL % OF DESIRABLE VEGETATION COVER 77
 VEGETATIVE COVER FAIL

Comment:

It was observed in this inspection that pipe equipment remains at the top of the cut slope to the east and two tanks were present on Location. On 6/27/22 Inspector O'Malley spoke with the Surface Owner, Matt Betts who indicated the tanks belong to him.

Overall, perennial grasses are well established on Location. Transects were conducted indicating vegetation is 77% of the reference area, nearly achieving the 80% benchmark. At the time of this inspection, livestock were highly concentrated on Location reducing desirable perennial cover. Due to the impacts of livestock at the time of this inspection, vegetative cover is considered sufficient. See attached transect data results and photos.

Corrective Action: **Provide documentation, attached to a Field Inspection Report Resolution (FIRR), indicating that the tanks on Location belong to the Surface Owner and if previously utilized for oil and gas operations have been cleaned of hazardous materials.**

Date **07/27/2022**

Overall Final Reclamation **Fail** Well Release on Active Location Multi-Well Location

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: **It was observed in this inspection the control measures to stabilize the cut slope at the east of the Location are missing or insufficient; slope is bare, undercutting is occurring to the hillside resulting in soil loss. Stormwater issues must be addressed to receive a passing final inspection.**

Corrective Action: **Install or repair required BMPs to stabilize the cut slope per Rule 1002.f.**

Date: 08/10/2022

Pits: NO SURFACE INDICATION OF PIT
