**LOCAL GOVERNMENT PERMITTING INFORMATION**County: GARFIELDMunicipality: N/A

Is the Surface Location of this Well in an area designated as one of State interest and subject to the requirements of §

24-65.1-108 C.R.S.? No

Per § 34-60-106(1)(f)(I)(A) C.R.S., the following questions pertain to the Relevant Local Government approval of the siting of the proposed Oil and Gas Location.

SB 19-181 provides that when "applying for a permit to drill," operators must include proof that they sought a local government siting permit and the disposition of that permit application, or that the local government does not have siting regulations. § 34-60-106(1)(f)(I)(A) C.R.S.

Does the Relevant Local Government regulate the siting of Oil and Gas Locations, with respect to this Location? ☐ Yes ☒ No☐ If yes, in checking this box, I hereby certify that an application has been filed with the local government with jurisdiction to approve the siting of the proposed oil and gas location.

The disposition of the application filed with the Relevant Local Government is: \_\_\_\_\_ Date of Final Disposition: \_\_\_\_\_

Comments: The Honea 19-05 pad is located within Lot 2 of Section 19, Township 7 South, Range 93 West, 6th P.M. on private land owned by TEP, in Garfield County, Colorado. TEP notified Garfield County, the Relevant Local Government with jurisdiction over the siting of the proposed oil and gas location on January 7, 2022. Per the Garfield County Land Use and Development Code, Division 2. 9-201, Oil and Gas Code, an Oil and Gas Permit is not required for locations that do not require an Alternative Location Analysis per Rule 304.b(2) B.i. through viii. and x. Since an Oil and Gas permit is not required, per Table 3-403, "Oil and Gas Drilling and Production" and "Hydraulic Fracturing, Remote Surface Location" are a use by right or Exempt from further Land Use Regulation. Garfield County's disposition is not required for the purpose of this submittal.

### Best Management Practices

**No BMP/COA Type** **Description**

1 Drilling/Completion Operations	Alternative Logging Program: The Honea Fed 24-09C well (API #05-045-19930), one of the first wells drilled on this pad, was logged with an open hole resistivity and gamma ray log from TD into the surface casing. All wells on the pad will have a cement bond log (CBL) with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs will state "Alternative Logging Program - No open-hole logs were run" and will clearly identify the type of log and the well (by API#) in which open-hole logs were run.
