Complaint

Comment:

Complaint #: 403100232
 Field Inspector Assigned: Chris Binschus
 Location ID#: 336611
 Inspection Document #: 697504044
 Nature of complaint: Complainant indicated that the portion of the location being irrigated was not satisfactory and a portion further to the west needed to be reclaimed.
 The complainant also had concerns about topsoil that was to be delivered by PDC. This is a civil matter and COGCC does not have jurisdiction regarding this matter.

Comment:

COGCC staff did not support the complainants concerns regarding the portion of the location being irrigated. This area did appear to have stressed growth but there were other adjacent reference areas that also displayed the same stressed growth.

COGCC staff did support the complainants concerns regarding a portion further to the west, even though portions have been disturbed by the surface owner. There appeared to be more area undisturbed by the surface owner that did not have successful germination.

After the Operator performs reclamation, the surface owner shall not disturb any portion of the reclamation. If the surface owner disturbs any portions of the reclamation area, it is no longer the responsibility of the Operator to reclaim.

Corrective Action:

Operator shall coordinate with the HOA and surface owner regarding the portion that needs to be reclaimed- refer to Photo 3.

Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.

Final reclamation activities shall be complete no later than 11/14/22 or as soon as environmental conditions will permit.

Date 11/14/2022

Overall Final Reclamation

Fail

Well Release on Active Location ☐Multi-Well Location ☐**COGCC Comments**

Comment	User	Date
COGCC Staff, Chris Binschus, will send an email to both the complainant and Operator regarding the final statement made in the Final Reclamation Comment section about any future disturbance.	binschusc	07/15/2022
Operator has performed final reclamation activities at the associated offsite tank battery and desirable vegetation was observed. It appears the area is being managed for weeds as the location appears to have been mowed recently.	binschusc	07/15/2022
Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management. Operator shall submit a Form 4 Final Reclamation Complete notice when the location meets Rule 1004 standards. COGCC may conduct inspections prior to receiving said notice to ensure compliance with Rule 1004.
