COGCC Field Inspection Form Doc.# 690203109
Lease Location & Lease Road Repair

Mr. Kosola:

Mull Drilling Co., Inc (Mull) is providing this update to the Colorado Oil and Gas Commission (COGCC) for repairs to the lease road and tank battery location: this includes the replacement of an earthen berm with a steel containment. The location in question was identified by Ryan Costa—a COGCC reclamation specialist—as needing repairs in a recent inspection. Repairs were made to the identified deficiencies the week of July 25th, 2022. As requested in the COGCC Field Inspection, the location is ready for a follow-up inspection.

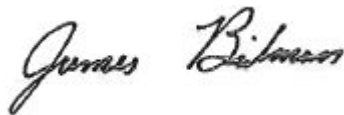

Site Location

During the inspection and subsequent communications with the division it was also identified that the lease road was being co-utilized by Enervest Operating, LLC. (Enervest) for their recent remedial activities nearby (Fluke-Chivington GR-Assoc 1-31). Attempts were made to contact Enervest relating to repairs required on the lease road. Unfortunately, no contact was returned. Mull would like the record to show that actions taken on our part to repair or regrade the road were independent of any Enervest actions or economic investment. Mull would also request that the frequent use of the road by Enervest be highlighted when addressing any future potential deficiencies.

In any event, attached are follow-up photos of the areas in question.
Photos were taken on 7.29.22

Should there be any questions or concerns feel free to contact us,

A handwritten signature in black ink that reads "James Beilman". The signature is written in a cursive, flowing style.
