Comment: The vegetation is progressing throughout the location. Areas of the road side were reportedly seeded in the previous spring season and vegetation has progressed since the previous inspection. There are some areas along the road that are not stabilized and vegetation has not established. BMP's must be maintained until final reclamation is achieved.

Comment: There are areas along the road that will require additional BMP's and maintenance. There are areas of erosion that need to be repaired and stabilized. The rock check dams have been reinstalled since the previous inspection. Some of the check dams are in need of maintenance due to stormwater flowing around the outside. The culverts installed along the road appear to be maintained. BMP's must be implemented in accordance with good engineering practice and must be maintained.

Corrective Action: Install or repair required BMPs per Rule 1002.f.(2)C

Date: 10/15/2022
