Comment: It was observed in this inspection that BMPs to control stormwater runoff in a manner that minimize erosion, sediment transport and site degradation are missing from the access road, and cut slopes of the Location; gully erosion evident.

Temporary stormwater and erosion controls required until final reclamation work is completed, at which point additional BMPs will be required to stabilize the seeded soils and reclamation areas.

Corrective Action: Comply with 1002.f; implement and maintain stormwater and erosion control BMPs in accordance with good engineering practices. Ongoing stormwater monitoring/management required until site receives a passing final reclamation inspection.
