**Photo 4:** Photo taken from the interim areas of the Location. Photos show areas not needed for production have been reduced, and interim areas have been recontoured/regraded and reclaimed. However, vegetation on the Location was observed to be predominantly undesirable plant species (prostrate knotweed), or annual forbs such as Rocky Mountain Beeplant; desirable perennial vegetative germination/establishment is sparse and not progress towards 1003.e.(2) requirements; additional seeding activities required.
