**Comment:** It was observed in this inspection that stormwater and erosion control BMPs have not been installed or maintained per good engineering practices; erosion degradation evident at sediment trap on the north end of the Location; inlet does not appear to have been constructed with a geotextile lining in conjunction with rip-rap armoring per good engineering practices, resulting in erosion degradation beneath the rock material; degradation also observed below the armored section of the inlet leading into the sediment trap.

**Corrective Action:** Comply with Rule 1002.f; install or repair stormwater and erosion control BMPs in accordance with good engineering practices; ensure BMPs are maintained in proper functioning condition until Location receives a passing final reclamation inspection.
