FIELD INSPECTION FORM

Loc ID 313136 Inspector Name: O'Malley, Anna On-Site Inspection 2A Doc Num: _____

Operator Information:

OGCC Operator Number: 27742
Name of Operator: EOG RESOURCES INC
Address: P O BOX 4362
City: HOUSTON State: TX Zip: 77210-

Status Summary:

- THIS IS A FOLLOW UP INSPECTION
 FOLLOW UP INSPECTION REQUIRED
 NO FOLLOW UP INSPECTION REQUIRED

Findings:

- 4 Number of Comments
2 Number of Corrective Actions
 Corrective Action Response Requested

**ANY CORRECTIVE ACTION(S) FROM
PREVIOUS INSPECTIONS THAT HAVE NOT
BEEN ADDRESSED ARE STILL APPLICABLE**

General Comment:

On 08/29/2022, Reclamation Specialist O'Malley conducted a Final Reclamation and Stormwater inspection at EOG Resources Inc's Fort Reynolds State-612N92W /36SWSW Location #313136 in Moffat County, Colorado.

The following compliance issues were observed during this inspection:

- Location access road remains
- Stormwater: gully erosion

Refer to the "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

1004.d. FINAL VEGETATION TRANSECT
 TRANSECT RESULTS OF DISTURBED AREA% _____
 TRANSECT RESULTS OF REFERENCE AREA% _____
 TOTAL % OF DESIRABLE VEGETATION COVER _____
 VEGETATIVE COVER _____

Comment:

This location does not meet reclamation requirements; access road remains. The Location access road has not been adequately reclaimed. Vegetation growth is absent in tire tracks where soils are compacted and bare. Vehicles appear to be utilizing the road, preventing revegetation. The access road must be reclaimed per Rule 1004.a.

At the time of this inspection vegetation on the Location is progressing towards 1004 standards. The Location is dominated by native perennial grasses, however, current vegetative cover does not appear adequate to stabilize the site. Refer to the "Stormwater" section of this inspection report.

Corrective Action:

Comply with 1004 Rules.

Conduct additional reclamation in accordance with COGCC 1000 series rules. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels on the Location and access road. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be completed no later than 11/15/2022.

Date 11/15/2022

Overall Final Reclamation **Fail** Well Release on Active Location Multi-Well Location

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment:

Insufficient stormwater and sediment control BMPs in place; there is a gully present at the south of the Location. Current vegetative cover on the Location does not appear to be sufficient to stabilize the site. Long-term stabilization of the site is required to receive a passing final inspection.

Corrective Action:

Comply with 1002.f. Implement and maintain stormwater and erosion control BMPs until long-term stabilization has been achieved and site has received a passing final reclamation inspection.

Date: 11/15/2022

Pits: NO SURFACE INDICATION OF PIT
