Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

At 6pm, on June 1, BLM agents discovered a drip on location of the Baldy Creek 2-20 and notified Jim Graves (Vision Energy pumper). First thing on June 2, 2022, Jim traveled to location, closed the valve causing the drip. He determined that a wild animal (likely a bear) broke the barrier surrounding the well head and rubbed on the equipment, opening the valve that caused the leak. In short: valve was closed and replaced by a plug, all parties agreed no water was impacted, Baldy Creek was in no way affected, no produced water left the location and only a 10'x10' area was affected by the spill. Vision understood that the volume was less than 1 bbl before the 24 hour expiration. Notification was still completed because of proximity to waters of Colorado. Soil sampling was completed - test results are delayed due to COVID. Attached is a comprehensive description of the incident as first reported via email to both COGCC and BLM on June 2, 2022.
