Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Producer contacted Summit Operator in reference to a leak on the sales line from H35. Producer noticed produced water bubbling to surface near the edge of the well pad. Based on initial observation of Summit Operator, the leak is currently estimated to be approx. 10 gallons of produced water, which estimate will be revised based on further investigation. The well pad was shut in and excavation will be required to make repairs and to remediate the soil.
