 Report of work done  State  Lease No. \_\_\_\_\_

Colorado State Logan County Cliff Field

1 UPRR - Casement NW SW 33 12N 54W 6  
 (Well No.) (Lease) (1/4 Sec.) (Sec.) (Twp.) (Range) (Meridian)

The Well is located \_\_\_\_\_ Ft. (N) of Section Line and \_\_\_\_\_ Ft. (E) of Section Line. (S) (W)

The elevation above sea level is \_\_\_\_\_ Ft.

Details of Plan of Work: (State names of and expected depths to objective sands. Show sizes, weights, and length of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

Remedial work was performed on the above described well for the purpose of shutting off the water and excessive gas. Perforations were placed from 5532-33 and cement squeezed through a drillable retainer at 5,472 feet. The original perforations were covered with sand and gravel, then another set of perforations were placed from 5,442-43. Cement was squeezed through these holes to shut off the gas. After the cement was allowed to set the sand and gravel was cleaned out to the retainer. It was necessary to re-perforate from 5,450-57 with 3 cone shots and 3 steel shots per foot. After doing 2 oil squeeze jobs to attempt opening the formation more, the well was placed on the pump for a production test.

Approved: SEP 22 1955
