COMMENTS:

At the request of Aaron Katz submitting sundry to document in well file.

The CS Hefley 4X went down with an ESP failure on 9/28/20. Chevron had not ordered replacement equipment for this well prior to selling the field, so Scout ordered it as soon as they took over operations. This equipment has been delayed due to nationwide shortages but is expected to be available in the first week of October. There are no suspected wellbore issues and the last bradenhead survey on 8/22/22 showed 17 psi on the production casing and 5 psi on the bradenhead.
