**(DETAILS OF WORK)**

This well completed as a "D" sand oil well in May 1955 and has produced 125,790 barrels oil to date. The well watered out in July 1963 and an unsuccessful attempt was made to complete in the "J" sand. It is now proposed to plug and abandon by setting a rock and cement bridge above perforations, shoot off casing at free point and pull, fill hole with mud with cement plugs in bottom and top of surface casing, weld steel plate on top of surface casing, clean up and level location.

NOTE: Bid letters have been sent to used material dealers for sale for net salvage of this well. Whether we sell or plug the well; Your Office will be contacted prior to starting plugging operations.
