General Comment:

On 9/12/2022, Reclamation Specialist Trujillo inspected Chevron USA Inc's Larson F V B-5 location in Rio Blanco County, Colorado.

The following compliance issues were observed during this inspection:

- Reclamation
- Weeds
- Stormwater

Refer to the "Location", "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

LocationOverall Good: ☐

Comment: Corrective Action: Date: **Good Housekeeping:**

Type	WEEDS		
Comment:	It was observed in this inspection that Undesirable and Noxious weed monitoring/management is inadequate throughout the reclamation area; Location is predominantly an Undesirable and Noxious plant monoculture (Halogeton). Noxious weeds observed have matured, and many appear to have seeded out for the year; additional management efforts will be necessary to manage weeds in the 2023 growing season		
Corrective Action:	Comply with Rules 1004.e and 606.c		Date: 09/21/2022

Comment: **It was observed in this inspection that reclamation efforts on the Location have failed; uniform desirable plant establishment is not progressing towards 1004 Reclamation standards; Location is predominantly an Undesirable and Noxious plant monoculture (Halogeton); desirable plant germination/establishment not evident. Additional revegetation and weed management efforts are required.**

Corrective Action:	Comply with 1004 rules and conduct additional reclamation; ensure BMPs are implemented to stabilize the seeded soils and to prevent weed establishment.	Date	11/15/2022
Overall Final Reclamation	Well Release on Active Location <input type="checkbox"/>	Multi-Well Location	<input type="checkbox"/>

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment:	It was observed in this inspection that BMPs to manage stormwater runoff in a manner that minimizes erosion, degradation and sediment transport are missing or insufficient; erosion degradation evident throughout slopes of the Location. Operator appears to have either seeded or tracked parallel to the slope, rather than up and down hill, resulting in vertical grooves and ridges which facilitated rilling and gully erosion.	Date:	09/21/2022
Corrective Action:	Comply with Rule 1002.f; install and maintain stormwater and erosion control measures; if it is determined that a specific BMP is insufficient to mitigate degradation on a site, cannot be implemented per installation specification, or maintained in effective operating condition, then alternative BMPs that are better suited to meet the site's conditions should be considered and applied, or used in conjunction. Upon completion of additional reclamation efforts, ensure BMPs are implemented to stabilize the seeded soils and to prevent weed establishment.		

Pits: ☐ NO SURFACE INDICATION OF PIT
