Gentlemen:

On July 29, 1986 a field inspection was done on the Mathewson #1 SWNW11-9N-55W, Logan County. The well was found to be plugged but the following was found:

surface equipment-Pump jack, separator, 400 bbl tank.  
three(3) evap. pits still open.  
skim pit still containing oil still open, has screen cover.

This well cannot be released from any bonds until the above work site has been reclaimed. Notify myself or Dennis Bicknell of this office when the reclamation work has been completed.

Thank you for your cooperation concerning this matter.

Yours truly,

Stephan Pott  
Petroleum Engineer
