FIELD OPERATIONS NOTICE

The Form 42 shall be submitted as required by Rule, Notice to Operators, Policy, or Condition of Approval. A Form 42 Update shall be submitted to revise the scheduled date or time on a previous Form 42 - Advance Notice of Field Operations. A Form 42 Update must be for the same well, location, or facility and for the same Field Operation as a previous Form 42. NOTE: Operator's Contact for Advance Notices of Field Operations should be available 24 hours a day, 7 days a week and should have the most current scheduling information for the operation. Operator's Contact for other notices should be able to respond to questions regarding the reported information.

Update of a previous Form 42 Notice NO

START OF PLUGGING OPERATIONS - 48-hour notice required
Date: 10/26/2022 Time: 08:00 (HH:MM)
Is the estimated duration of the Plugging Operations for this Well anticipated to last for longer than one day? Yes
If YES, describe the estimated anticipated duration of these operations:

Plan to move in coiled tubing unit on 10/25, rig up, and start P&A operations on 10/26-27. Coiled tubing unit will be utilized to drill through surface plug and shoe plug in a controlled pressure environment to reduce risk of encountering any trapped pressure below the cement plugs. Once well pressures are evaluated, kill weight mud will be circulated and well will be temporarily suspended with mechanical barriers at surface. A workover service rig will move in to enter open hole and plug well.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct and complete.
