General Comment:

On 10/11/2022, Reclamation Specialist O'Malley conducted a final reclamation and stormwater inspection at Mull Drilling Company Inc's STATE AVALANCHE612N92W/24NWNE Location #313080 in Moffat County, Colorado.

The following compliance issues were observed during this inspection:

- Noxious Weeds
- Access road remains
- Fencing remains
- Revegetation failed/not progressing

Refer to the "Location," "Reclamation," and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

LocationOverall Good: ☐

Emergency Contact Number:

Comment: Corrective Action: Date: **Good Housekeeping:**

Type	WEEDS		
Comment:	<p>Russian knapweed (List B Noxious) was observed at the northwest of the Location. Cheatgrass is widespread and halogeton is occasional (List C Noxious). Annual wheatgrass (undesirable plant species/weed) dominates portions of the Location at the northwest and southwest within the tank battery fence.</p> <p>A fall corrective action date is given due to the presence of Russian knapweed. Operator is encouraged to determine the best method and timing for treatment of each particular species. Ongoing management is required.</p>		
Corrective Action:	Conduct weed management to prevent further establishment and spread of undesirable plant species and noxious weeds; ongoing weed management required until location passes final reclamation.	Date:	11/15/2022

Comment:

	<p>Refer to the "Location" section of this inspection report for weed control corrective action.</p> <p>This location does not meet reclamation requirements; insufficient vegetative cover/revegetation failed, noxious weeds and undesirable plant species present, access road unreclaimed, fencing remains.</p> <p>It does not appear the location was properly reclaimed. Gravel and compacted soils are evident below a layer of soil spread over portions of the location and access road. Portions of the location vary in levels of reclamation and revegetation. Operator must determine areas requiring additional reclamation/seeding to achieve 1004 standards.</p>	
Corrective Action:	<p>Conduct additional reclamation in accordance with COGCC 1000 series rules. Remove fencing. Reclaim access road. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels on the Location and access road. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be completed no later than 5/1/2023.</p>	Date 05/01/2023
