102564	PIT	AC			-	RANGLEY WEBER MAIN WTR PLANT	EI
483023	SPILL OR RELEASE	AC	10/05/2022		-	MWP P-1750 Suction Line	EI

General Comment:

On 10/6/2022 COGCC staff, Kris Neidel inspected spill 483023 that was reported to COGCC by Scout (operator) on 10/4/2022. The following was observed; Temps of 65 degrees and sunny, the previous few weeks had seen many days of precipitation, at the time of inspection the surface of the ground was dry but moist, The point of release was observed and the spill path(s) walked to the terminus point at Pit Facility 102564. It was reported that all spilled fluid went to the pit and none overtopped or bypassed the pit, this statement appears consistent with Field observations as a part of this inspection. The spill path that was reported in Doc #403186450 appears to be accurate to what was witnessed during this field inspection. Some slight hydrocarbon staining was observed on, the foundations of the buildings near the spill point and adjacent Storage Tank. No hydrocarbon staining was observed off of the Main Water Plant Facility location. Some salt staining was observed in the spill path and in what appeared to be un-impacted adjacent soil. Conditions of approval and ongoing spill remediation is taking place through the Form 19 process.

Inspected Facilities

Facility ID: 102564 Type: PIT API Number: - Status: AC Insp. Status: EI

Facility ID: 483023 Type: SPILL OR API Number: - Status: AC Insp. Status: EI

Environmental

Spills/Releases:

Type of Spill: PRODUCED WATER Estimated Spill Volume: _____

Comment: spill was reported by the operator. The

Corrective Action: spill clean up is being done under spill doc 403186411. Date: 10/01/2022

Reportable: _____ GPS: Lat _____ Long _____

Proximity to Surface Water: _____ Depth to Ground Water: _____
