

Removed 4" of soil to clean site. Stopped at that point because after that it needed to be spot dug. It would make the site soft to spot dig stains out now, so it was decided to wait until after the frac.

99.70 tons was removed

Twin Enviro charge

99.70 x \$50.00 per ton = \$4,985.00

Freight from pad to Twin Enviro \$ 3,200.00

Grader \$ 1,980.00

Road base \$ 1,760.00

---

\$ 11,925.00

Road base only hauled 24 yards to level pad

The rest of the road base will be hauled in after spot digging is complete

Things that need to be remembered

Shale bin costs are not included

The site is still damp from the snow, so it is hard to tell where it needs to be fixed. The site needs to dry up.

Halliburton's Barr silo was full and plugged up, so it was impossible to grade site.

They were still pumping fresh water down the well
