General Comment:

On 10/11/2022, Reclamation Specialist O'Malley conducted a final reclamation and stormwater inspection at Mull Drilling Company Inc's STATE AVALANCHE612N92W/24SESE Location #313088 in Moffat County, Colorado.

The following compliance issues were observed during this inspection:
- Undesirable plant species/weeds

Refer to the "Location," "Reclamation," "Stormwater" and "COGCC Comments" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Good Housekeeping:

Type	WEEDS		
Comment:	A variety of annual undesirable plant species/weeds are present which may be interfering with establishment of desirable perennials in some areas. Undesirable plant species include Russian thistle, kochia, alyssum, field brome and bur buttercup. Russian thistle is the most common undesirable species present. Cheatgrass and halogeton (List C Noxious) are also present but at lower levels. A Spring corrective action date is given due to the species present and to give the Operator flexibility to both treat weeds and reseed if necessary.		
Corrective Action:	Conduct weed management to prevent further establishment and spread of undesirable plant species and noxious weeds; ongoing weed management required until Location passes final reclamation.	Date:	05/01/2023

Comment:

Refer to the "Location" section of this inspection report for weed control corrective action.

It was observed in this inspection that the Location has been reclaimed. A perimeter fence has been installed to exclude livestock. Perennial grasses are well established, however portions of the Location have poor perennial establishment and are dominated by either bare ground or annual weeds. Additional seeding may be necessary to achieve 1004 revegetation standards in some areas of both the Location and access road. Operator shall continue to monitor and manage the Location until site receives a passing final inspection, and take proactive measures to ensure the reclamation continues to progress to 1004 standards.

COGCC Comments

Comment	User	Date
Document #401919621 submitted by the Operator states that the landowner wishes to retain a cattle guard on site and the Reclamation Specialist authorized the cattle guard retention. Please note, that COGCC Staff cannot provide exceptions to COGCC Rules. To receive a passing final reclamation inspection the cattle guard and perimeter fence must be removed. If the fence and/or cattle guard are to be retained the Operator must submit a Surface Owner Variance Request. The request must be from the Surface Owner, not the Surface Lessee. Variance requests must be submitted via hearings application to the commission per Rules 502 and 510.	omalleya	10/24/2022
