General Comment:

On 10/20/2022, Reclamation Specialist O'Malley conducted a Final Reclamation and Stormwater inspection at EOG Resources Inc's BAKERS PEAK-611N91W/13SWNE Location #313220 in Moffat County, Colorado.

The following compliance issues were observed during this inspection:

- Noxious weeds
- Trash/debris
- Vegetation not progressing towards 1004 standards on portions of the Location

Refer to the "Location," "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Good Housekeeping:

Type	WEEDS		
Comment:	Noxious weeds are common on the Location and access road. On portions of the Location they are dominant and appear to have outcompeted perennial species. Noxious species include houndstongue, Canada, Scotch and bull thistle (List B Noxious) and cheatgrass (List C Noxious). Thistles were observed in various stages of development (dispersing seed and basal rosettes). A Spring corrective action date is given to allow the Operator time to treat noxious weeds and reseed without the two actions interfering. Treatment may still be possible and appropriate in Fall of 2022.		
Corrective Action:	Conduct weed management to prevent further establishment and spread of undesirable plant species and noxious weeds; ongoing weed management required until Location passes final reclamation.	Date:	05/01/2023
Type	TRASH		
Comment:	Trash/debris was present on Location. Inspector removed all trash/debris that was found. Operator shall comply with Rule 606 and 1004.a and continue to remove and prevent any trash/debris until Location passes final reclamation.

Comment:

	<p>Refer to the "Location" section of this inspection report for weed control corrective action.</p> <p>This Location does not meet reclamation requirements; insufficient vegetative cover. Portions of the Location and access road have poor perennial establishment and are dominated by annual and or noxious weeds. In particular, the northeast of the Location requires additional reclamation, however other smaller areas throughout the Location are also inadequate. Many portions of the Location have very good perennial establishment.</p> <p>A spring corrective action date is given to allow the Operator time to treat noxious weeds and reseed without the two actions interfering. Seeding may still be possible and appropriate in fall of 2022.</p>	
Corrective Action:	<p>Conduct additional reclamation in accordance with COGCC 1000 series rules. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be completed no later than 5/1/2023.</p>	Date 05/01/2023
