**General Comment:**

Compliance supervisor Steve Labowskie conducted routine inspection while in area responding to complaints noticed well cellar full of discolored fluid with a portion of the protective grate missing and contacted operator. Other well cellars in area did not have standing fluid. FLIR survey did not indicate any gas leaks, there were no bubbles in standing fluid, there were no fluid leaks observed in above grade flowlines or valves. Route cause should be evaluated and cellar kept from overflowing with precipitation and wildlife protection grate/screen be kept in place.

**Location**Overall Good: ☐
