Comment Areas of the location not needed for production, or no longer in use have been reduced and reclaimed. Interim areas are vegetated with introduced and native perennial grasses (crested, intermediate, tall, western, bluebunch wheatgrass). Interim areas to the northwest have been recently reclaimed. It appears a large amount of cheatgrass is germinating in this area. TEP shall continue to monitor and manage the recently reclaimed area to determine if action is needed to control weeds or reseed.
