**Photo 3.** Taken from the access road, facing northwest. Photo illustrates the access road has not been recontoured to reflect reference areas. The portion of the access road appears to have been built in a natural swale and will need to be graded and contoured in order to meet final reclamation standards. Refer to Photo 5 for an aerial view. Green arrow shows approximate western edge of access road and direction of travel.

**Photo 5.** Google Earth aerial imagery taken circa 10/2014. Aerial illustrates the natural feature (e.g. swale) that has been disconnected by the access road to the location. Based on field observations and desktop review, this portion will need to be recontoured and graded to reflect reference areas.
