Other Information:

Based on the 909J sample for wells surrounding the Parrothead 31-31, which are producing from the same CBM formations, results show there are no detectable Benzene, Toluene, Ethylbenzene, Xylenes (BTEX), and Total Petroleum Hydrocarbons (TPH) constituents in the water. With no organic compounds in the produced water which may be discharged into pit ID#264508, there is no potential for volatile organic compounds (VOCs) emissions.
